## SUMMARY

An energetic and motivated young web developer with a strong background in JavaScript, HTML and CSS. Seeking an entry level web developer position in a company where I can use my educational background to develop my skills.

## SKILLS

**PROGRAMMING:** HTML, CSS, JavaScript, Node.js, React.js, Redux, Firebase, Bootstrap, jQuery, Arduino, Git

**LANGUAGES:** English, Russian, Georgian, Armenian

## PROJECTS

### Instagram-React-Clone

Instagram clone including features like user authentication, post adding, profile page, etc. Written in React.js with using of Firebase as back end. The program is mostly written with React Hooks and also uses a library called Material-UI for the interface.

### Contact-Site

A responsive one-page website with form validating, animations, etc. Is written in plain HTML, CSS, and JavaScript.

### React To-do List

To-do list with a modern interface made using React.js and using its library Material-UI for a friendly interface.

### Color Project

This project lets users create different pallets and store a lot of colors in it, which can be used later. Written in React.js and using a library Material-UI. The project uses React Router to access specific pallets and the "react-sortable-hoc" library to make drag and drop.

### Form-Sending

The program sends information about the user such as geolocation and the form data which the user filled out to indicated e-mail. Written in Node.js and using a library Nodemailer for email sending.

### Lights-Out

Clone of a logical game called "Lights-Out" where the user should turn light off all squares made with React.js.

### Mountain-Travel

A responsive one-page website with modern design for travel agency. Written in HTML and CSS.

### Hangman Game

Clone of a game called "Hangman" made with React.js. In game users should guess a word.
