FRONTEND DEVELOPER / GRAPHIC DESIGNER

Frontend developer passionate about coding and my profession. Capable of quickly learning new programming languages and obtaining new skills.

Already having a few frontend languages, libraries and frameworks such as HTML, CSS, JavaScript, jQuery and React JS on my tech skills list, these days I am slowly moving to the backend programming by learning Node.js, Express.js and Mongo DB. Past experience with PHP and MySQL is a great asset during this enthusiastic journey!
