Summary

An aspiring & motivated Web developer who's actively learning and mastering Web development via internet since October 2020. Seeking an entry level Web developer position in a company which will help me to develop my skills.

Projects

- **Drum Machine**

My "drum machine" is an electronic musical instrument with modern user interface, in which you can play hip hop, house or metal melody & drum kits. You can trigger audio by clicking drum-pad or pressing specific key on keyboard.

- **Pomodoro Timer + Tasks**

Simple timer web application, which uses the [Pomodoro Technique](#). Timer also have "Tasks" section where user can make to-do list, choose one task as a current and do the productive work with the timer!

- **Quiz App**

Fetches [Trivia API](#) to receive test questions, then made a simple quiz web application which allows user to answer test questions. User can choose test category and difficulty before starting and see the test results after finishing.

- **Github Profiles**

Fetches GitHub API to receive data from users, then made a website of which landing page represents the most popular users of GitHub and has a toggle button to switch between list and grid views. You can search for user and see their repositories, organization that user belongs & little more details... (+ React Router)

- **More Projects**
