Education

Ilia State University   **Tbilisi, Georgia**
Bachelor's Degree in Computer Engineering   *2019 - 2023*

Bitcamp   **Online Bootcamp**
Stage 3   *Aug 2020 - present*

Skills

Languages: English, Georgian

Tech Stack: HTML, CSS, JavaScript, React, Redux, Node, Express, MongoDB

Cover Letter

I am very motivated and hard worker aspiring full stack web developer. I have experience working with projects involving to write front-end code and also back-end microservice API. I am willing to work hard and learn new things. I am looking for internship opportunities to gain real-world experience and to work with experienced people.

Projects

FreeCodeCamp APIs and Microservices   **stack: Node, Express, MongoDB**

- **Timestamp Microservice**   *Github link*

  Made timetamp microservice, which parses url parameter and returns appropriate response in json format

- **Request Header Parser Microservice**   *Github link*

  Made little microservice, which returns client ip, and values of "Accept-Language" and "User-Agent" headers

- **URL Shortener Microservice**   *Github link*

  Microservice, which saves urls and related shortened url in MongoDB Cloud database and redirects in the saved url, if you go to shortened url

- **Exercise Tracker**   *Github link*

  Microservice, which adds users to Mongo database and relates exercises to individual users, also returns exercises based on user and can limit exercises based on time.

- **File Metadata Microservice**   *Github link*

  Simple microservice, which allows files to be uploaded on the server and returns uploaded file data. Required Multer middleware, which parses file data

---

FreeCodeCamp Front End Libraries   **stack: HTML, CSS, JS, React**

- **Random Quote Machine**   *Github link*

  Simple random quote machine using freecodecamp quotes API

- **Markdown Previewer**   *Github link*

  Simple markdown previewer using MarkedJS and React

- **Drum Machine**   *Github link*

  Drum machine GUI using React

- **JavaScript Calculator**   *Github link*

  Written logic to interpret user input in React

- **Pomodoro Clock**   *Github link*

  Pomodoro system implementation in React

FreeCodeCamp Responsive Web Design   **stack: HTML, CSS**

- **Tribute Page**   *Github link*

- **Survey Form**   *Github link*

- **Product Landing Page**   *Github link*

- **Technical Documentation**   *Github link*

- **Personal Portfolio**   *Github link*
