EDUCATION

Caucasus University
Computer Science
September 2018 – Present · Tbilisi, Georgia

SKILLS

- **HTML5**
- **CSS3/Sass/Bootstrap**
- **JavaScript**
- **ReactJS**
- **PHP**
- **GIT (basics)**

PROJECTS

COVID-19 Tracker

- COVID-19 Tracker built with ReactJS. I used Material-UI, LeafletJS, ChartJS. You can track COVID-19 cases, deaths and recoveries all over the world or for specific country.
- https://zura0z.github.io/covid19-tracker/

Netflix clone

- Fetched free movies API to build Netflix clone with ReactJs. You can search for movies, see posters, trailers and read descriptions.
- https://zura0z.github.io/netflix-clone/

Github Profiles

- Fetched Github API with axios to build Github Profiles with ReactJs. Landing page displays popular users and has a toggle button to switch between list and grid views. You can search for a user, see their repositories and organizations that user belongs.
- https://zura0z.github.io/github-profiles/

Drum Machine

- Drum Machine built with ReactJS. A drum machine is an electronic musical instrument that can imitate drum or piano kits. You can play it by clicking on drum-pad or pressing specific keys on keyboard to trigger audio.
- https://zura0z.github.io/drum-machine/

Calculator

- Simple calculator built with ReactJS.
- https://zura0z.github.io/calculator/

BlackJack

- BlackJack game written in JavaScript. Player must decide whether to "stand" - not ask for another card, or "hit" - ask for another card in an attempt to get closer to a count of 21, or even hit 21 exactly. If you exceed 21 points, you lose.
- https://zura0z.github.io/BlackJack/

Random Quote Machine

- Random Quote Machine built with ReactJS. Making an API call using axios and generating random quotes from famous people. Background color changes as you generate new quote. Also you can share quote on Twitter.
- https://zura0z.github.io/random-quote-machine/

Markdown Previewer

- Markdown Previewer built with ReactJS. I used marked library. You can enter GitHub flavored markdown into the Editor element, the text is rendered as HTML in the Preview element.
- https://zura0z.github.io/markdown-previewer/

YouTube Videos

- Used Google API to build online videos website with ReactJS. You can search for videos, read description and watch them.
- https://zura0z.github.io/videos/

Registration Form

- JavaScript registration authentication form. I used Bootstrap to style it.
- https://zura0z.github.io/form/

Simple HTML & CSS Websites

- https://zura0z.github.io/site/
- https://zura0z.github.io/real-estate-website/
- https://zura0z.github.io/travel-agency/
- https://zura0z.github.io/3d-card/
