SUMMARY

An energetic and motivated young web developer with a strong background in JavaScript, HTML and CSS. Seeking an entry level web developer position in a company where I can use my educational background to develop my skills.

SKILLS

PROGRAMMING: HTML, CSS, JavaScript, React.js, Redux, Firebase, Node.js, Bootstrap, jQuery, Arduino, Git
LANGUAGES: English, Georgian, Russian, Armenian

PROJECTS

Messenger Clone
Facebook Messenger clone including features: chatting with users, creating groups, user authentication etc. Written in React.js with usage of Redux.js for state management and Firebase as for back end.

Instagram Clone
Instagram clone including features like user authentication, post adding, profile page, etc. Written in React.js with usage of Firebase for back end. The program is mostly implemented with React Hooks and a library called Material-UI for the interface.

Contact Site
A responsive one-page website with form validating, animations, etc. Written in plain HTML, CSS, and JavaScript.

React To-Do List
To-do list with a modern interface made using React.js and using its library Material-UI for a friendly interface.

Color Project
This project lets users create different pallets and store a lot of colors in it, which can be used later. Written in React.js with usage of a library Material-UI. The project uses React Router to access specific pallets and the "react-sortable-hoc" library to make drag and drop.

Form Sending
The program sends information about the user such as geolocation and the form data which the user filled out to indicated e-mail. Written in Node.js and using a library Nodemailer for email sending.

Mountain Travel
A responsive one-page website with modern design for travel agency. Written in HTML and CSS.

Lights-Out
Clone of a logical game written in React.js, called "Lights-Out", where the user should turn off the lights of all squares.
